

Drawing a pie chart

Here is a survey completed by 30 households who were asked what washing powder they used. Draw a pie chart to show this information.

Powder	Swish	Woosh	Sparkle	Dazzle
Frequency	6	12	8	4
Angle				

How to find the angles

Total number of households in survey =

Angle occupied by **each** household = $360^\circ \div \dots = \dots^\circ$

Now complete the table above and the pie chart below.
