

TRANSFORMATIONS - Reflections

The diagram shows how the shape A has been **reflected** to produce images B, C, D and E.

Draw the **FOUR** mirror lines of reflection on the grid below to show how A has been reflected.

Give the equations of each of the lines you have drawn

A is reflected onto B using the line (equation)

A is reflected onto C using the line (equation)

A is reflected onto D using the line (equation)

A is reflected onto E using the line (equation)
