

Going to the Cinema - Decimals & Money

dreamstime.com

Adult £5.95
Child £2.95

Large £2.75
Small £1.50

Large £2.50
Small £1.60

1. Find the cost of buying two adult cinema tickets.
2. Find the cost of one adult ticket, one child's ticket and two large boxes of popcorn.
3. I buy two adult tickets and a small drink. How much change will I receive from £20?
4. A family of two adults and two children all go to the cinema. They each want a small box of popcorn and agree to share two large drinks. How much do they pay in total?

As a promotion, the cinema offers the following deal :

Buy one adult ticket and a child goes FREE.

5. Work out the cost of paying for
 - (a) One adult and three children
 - (b) Two adults and three children
 - (c) Three adults and three children

A special WEDNESDAY night promotion says :

1 LARGE popcorn + a LARGE drink = £4.00

- 6 . Two friends need two tickets, two large popcorn and two large drinks.
How much cheaper is it on a Wednesday than on any other night?
