

Finding the AREA of a circle **Area of a circle = $\pi \times r^2$**

1. Work out the following values

- (a) 4×4 (b) 9×9 (c) 6^2 (d) 8.5^2

2. Find the area of the following circles. The **radius** is given in each.

2. Find the area of the following circles. The **diameter** is given in each.

3. A circular table has a radius of 1.2 metres. Calculate the area of the table's surface. Give your answer to **one decimal place**.

4. A metal washer has a diameter of 50mm. The inner hole has a diameter of 20mm. Calculate the area of the washer. Give your answer to one decimal place.
